LightAide
Fun and enlightened learning!
What is LightAide?

Philips and Perkins Products have partnered to develop a light-based educational tool to engage Learners with special needs.

Features

Amazing technology with:

• Activities designed to support all levels of learning
• Simple to set up, easy to use
• Up to 4 Learners can use simultaneously
• Safe and touchable surface
• 224 bright multicolored energy efficient LEDs
• Portable and lightweight design
• Fast and flexible method to change activities
• Quick and easy updates for new activities

Benefits

Help learners to understand:

• Cause and effect
• Alphabet and numbers
• Turn-taking, negotiation and other social interactions
• Visual tracking for pre-reading experiences
• Sequencing and organizational skills for literacy readiness

What teachers are saying about LightAide:

“It is a good visual cause and effect tool; I could use it as part of a CVI or functional vision assessment.”

“This product really helps children to become interested in using their vision. Not only that but the texture of the product itself encourages physical engagement.”

“The LightAide has enough activities that it can be appropriate for a wide range of levels and needs.”
